## 域名解析

Windows域名解析需要修改hosts文件, 在其中添加映射即可, 注意需要管理员权限

题目:

Challenge 14855 Solves

### 域名解析

50

听说把 flag.baidu.com 解析到 123.206.87.240 就能拿到flag

Flag

Sub

```
hosts
1 # Copyright (c) 1993-2009 Microsoft Corp.
2 #
3 # This is a sample HOSTS file used by Microsoft TCP/IP for Windows.
4 #
5 # This file contains the mappings of IP addresses to host names. Each
6 # entry should be kept on an individual line. The IP address should
7 # be placed in the first column followed by the corresponding host nam
8 # The IP address and the host name should be separated by at least one
9 # space.
10 #
11 # Additionally, comments (such as these) may be inserted on individual
12 # lines or following the machine name denoted by a '#' symbol.
13 #
14 # For example:
15 #
16 #         102.54.94.97       rhino.acme.com          # source server
17 #         38.25.63.10      x.acme.com              # x client host
18 #
19 # localhost name resolution is handled within DNS itself.
20 #   127.0.0.1          localhost
21 #   ::1                localhost
22 # 127.0.0.1           activate.navicat.com
23 # 123.206.87.240     flag.baidu.com
```

win10中hosts文件在C:\Windows\System32\drivers\etc下

修改之后浏览器访问flag.baidu.com即可看到flag
