示范开始

1.新建一个"new"文件夹

2.在new文件夹里创建需要上传的文件

git config --global user.name 99Kies

git config -global user.email 邮箱

查看设置好的用户名和邮箱可用以下两条命令

git configglobal user.name	#查看设置的用户名
git configglobal user.email	#查看设置的邮箱

上传文件

1. 创建暂存库

git init #在本地创建一个小库

执行成功的标志是所在路径新创建出来一个名为.git的隐藏文件夹。

.git	first_cla	ss.txt	
😣 🖻 🗉 tom@	þtom-virtual-m	achine: ~/桌面/new	
tom@tom-virt 初始化空的 G	ual-machine: it 仓库于 /h	~/桌面/new\$ git init ome/tomp:架面;%Hew)et/gqt1) ⁹³⁸¹⁹⁸	39

#在Ubuntu中 CTRL + H 可以查看文件夹中的隐藏文件

2. 把本地first_class.txt文件提交到暂存区

git add first_class.txt

如何把本地开发者编写的代码提交到暂存区,使用git add命令就可以

3. 提交到暂存区后,查看是否上传成功

绿色的表示添加成功的文件。红色的则表示还未添加的文件

4.把缓存区的first_class.txt文件提交到本地主仓库内

这条命令会把数据暂存区的所有内容都提交到本地主仓库,所以不需要指明提交那个文件

⁽红线部分 是我添加的备注)

5.再次使用 git status 查看是否提交成功

(绿色消失则表示传入本地文件库成功)

6.提交到主仓库后,再提交到gitHub服务器上

git push 网址 master

将本地主仓库的内部代码提交到GitHub远程服务器上

在提交的过程中会让输入GitHub的账号和密码,输入即可

.git	2.txt	first_class.txt			
e tom@tom-virtual-machine: ~/桌面/new tom@tom-virtual-machine: ~/桌面/new\$ git push https://github.com/99Kies/Hello_Example.git master Username for 'https://github.com': 99Kies Username for 'https://github.com': 99Kies

一开始也比较蒙,但是完全是自己想多了,再看了一些教程视频+书籍+writeup

才发现!!! 一篇好的writeup比一连串的视频有用多了

个人认为看那么多视频教程 还不如静下心来 上机实际操作一下

git的语言可以慢慢来 下面附上一张好表 请收下

https://blog.csdn.net/halaoda/article/details/78661334 Git常用命令大全

不用刻意去背看几遍之后就可以上手,不会之后再谷歌,上机实验往往会比书呆子好用!!!
