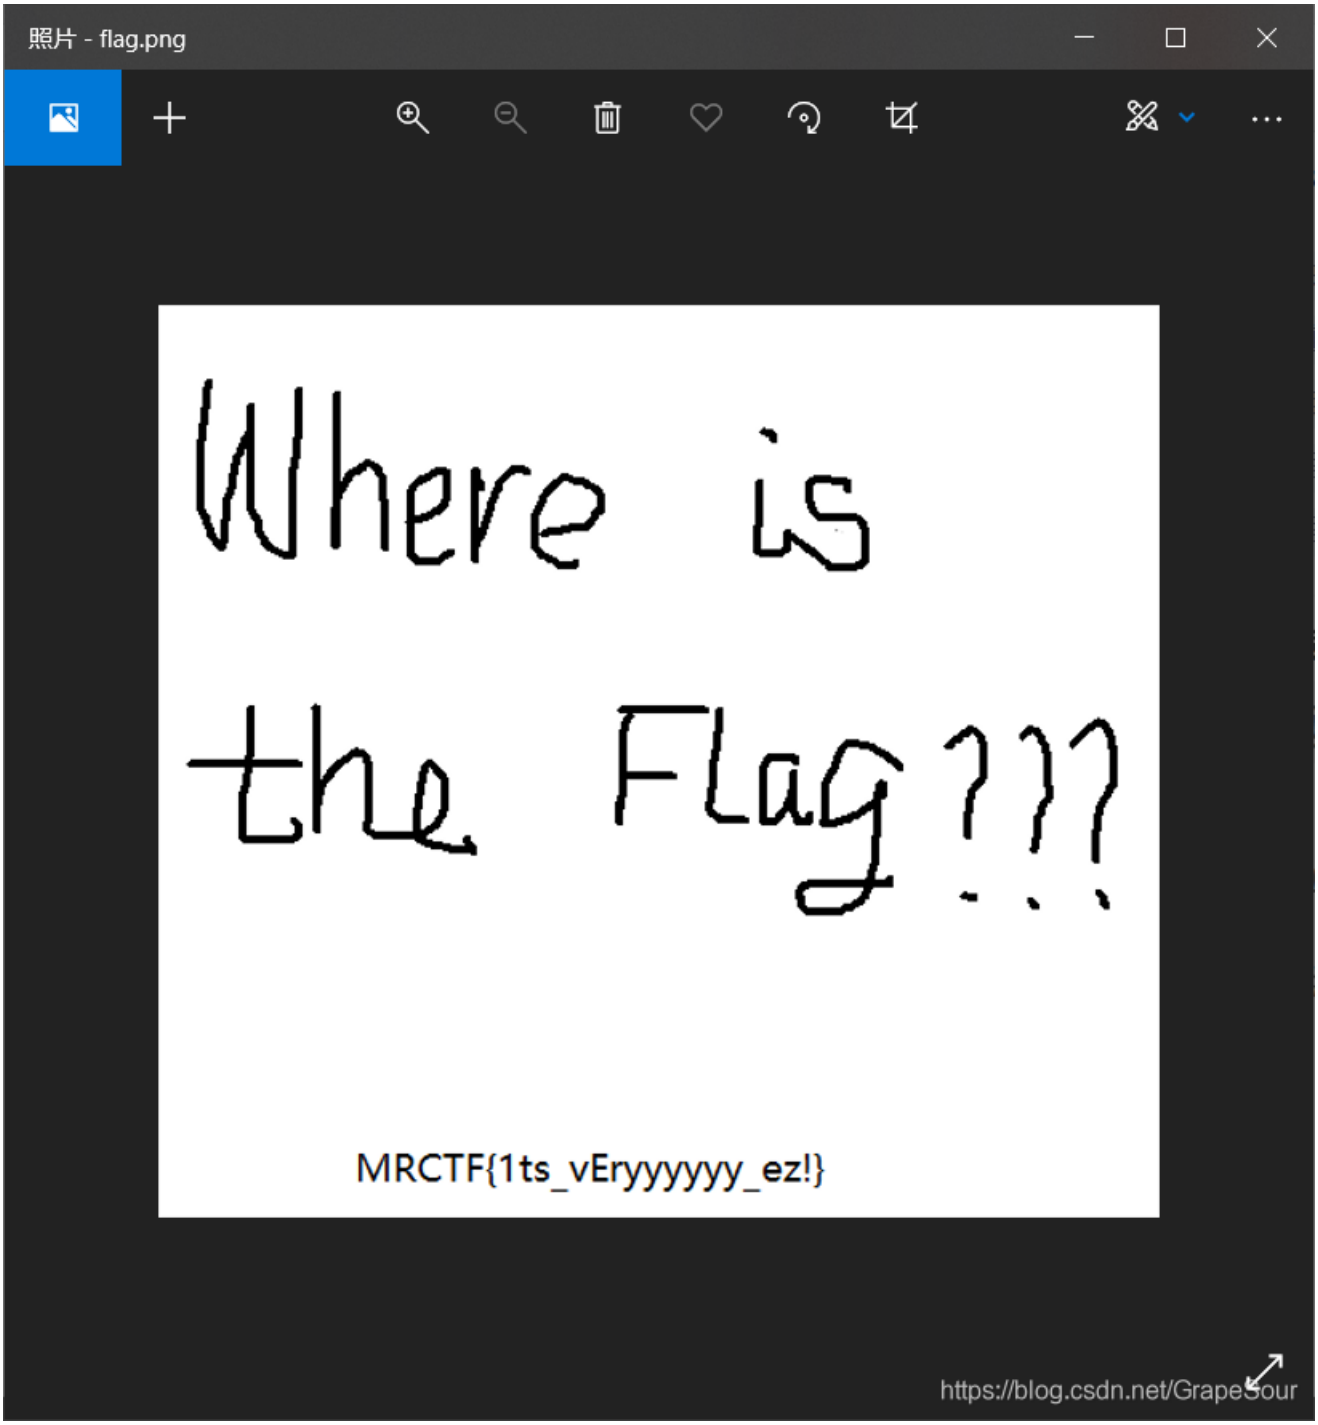
BUU---7.14

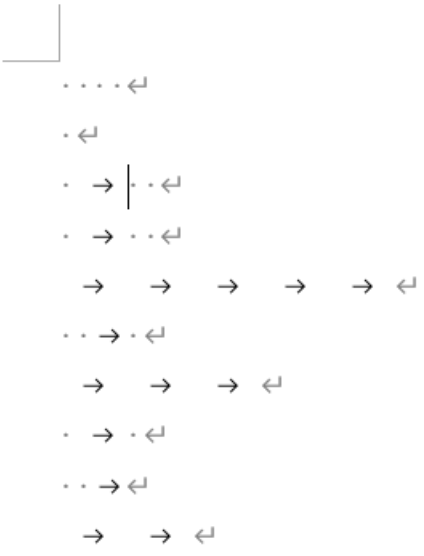
[MRCTF2020]ezmisc

打开图片发现有crc报错，跑一下脚本，爆出正确高度为0x1c8，得到flag



弱口令

先尝试爆破没有成功，复制注释得到



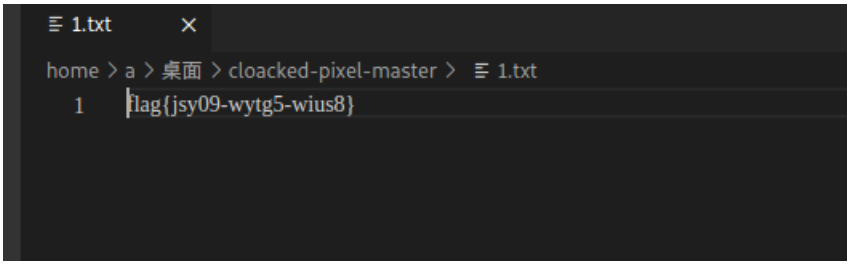
是摩斯密码，将.看成.，将->看成-，得到

```
.... . .-.. .-.. ----- ..-. --- .-. ..- --
```

所以密码为

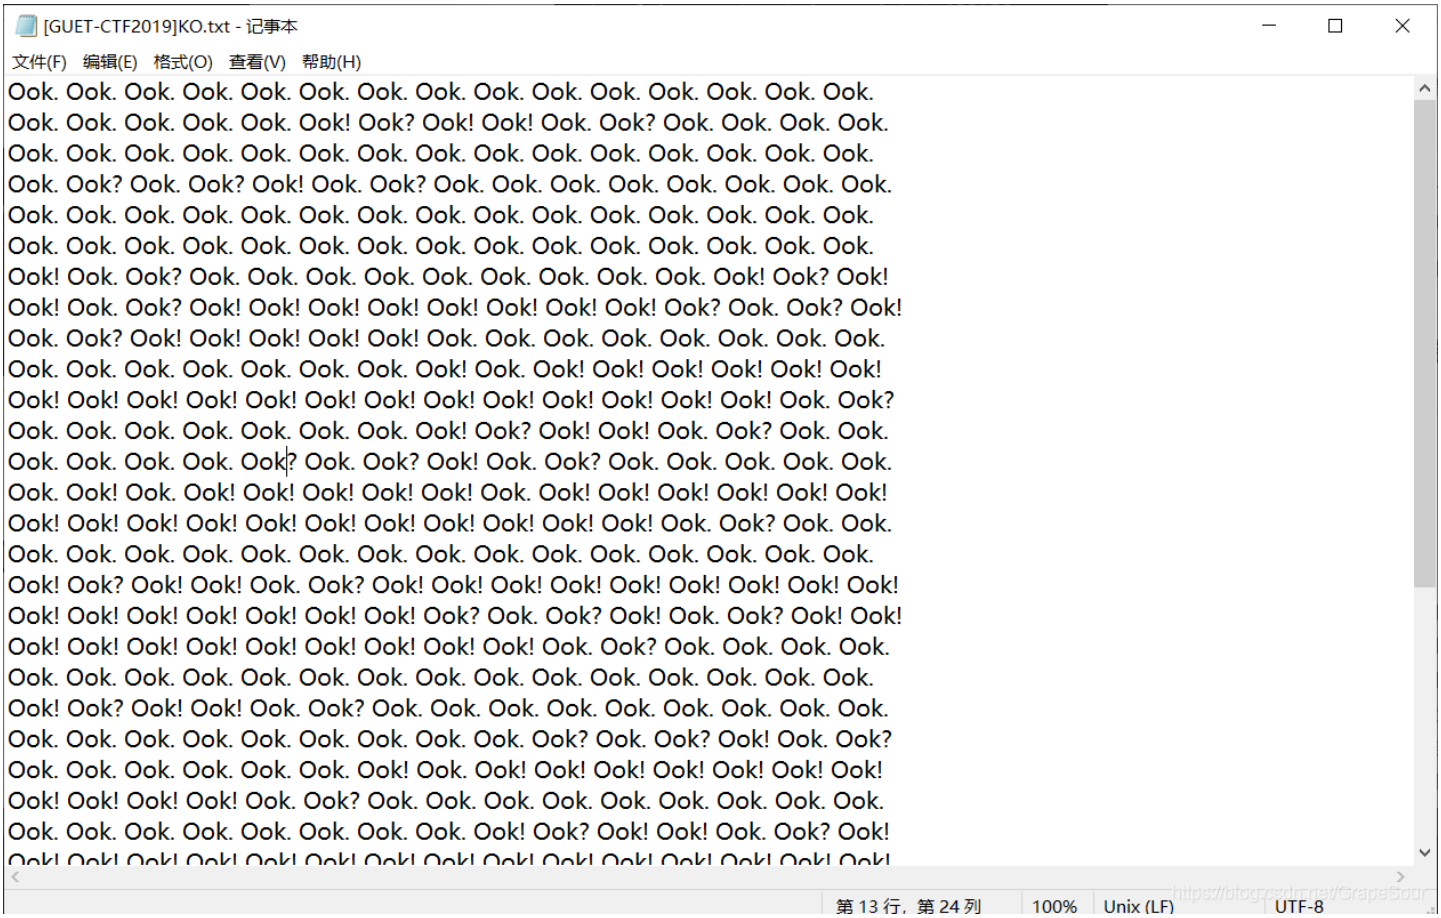
```
HELL0FORUM
```

因为说的是弱口令，所以推测是lsb隐写，



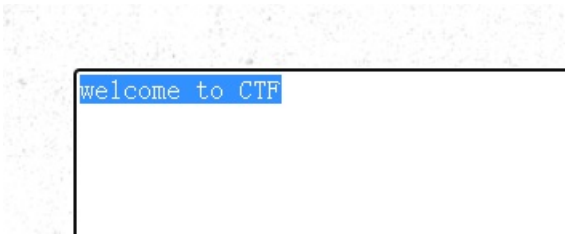
[GUET-CTF2019]KO

得到一个txt文档



> Ook!编码

Ook编码



[HBNIS2018]caesar

```
gmbhjtdbftbs
```

```
1
```

```
flagiscaesar
```

[HBNIS2018]低个头

看键盘，所以是
但是不是我想象的

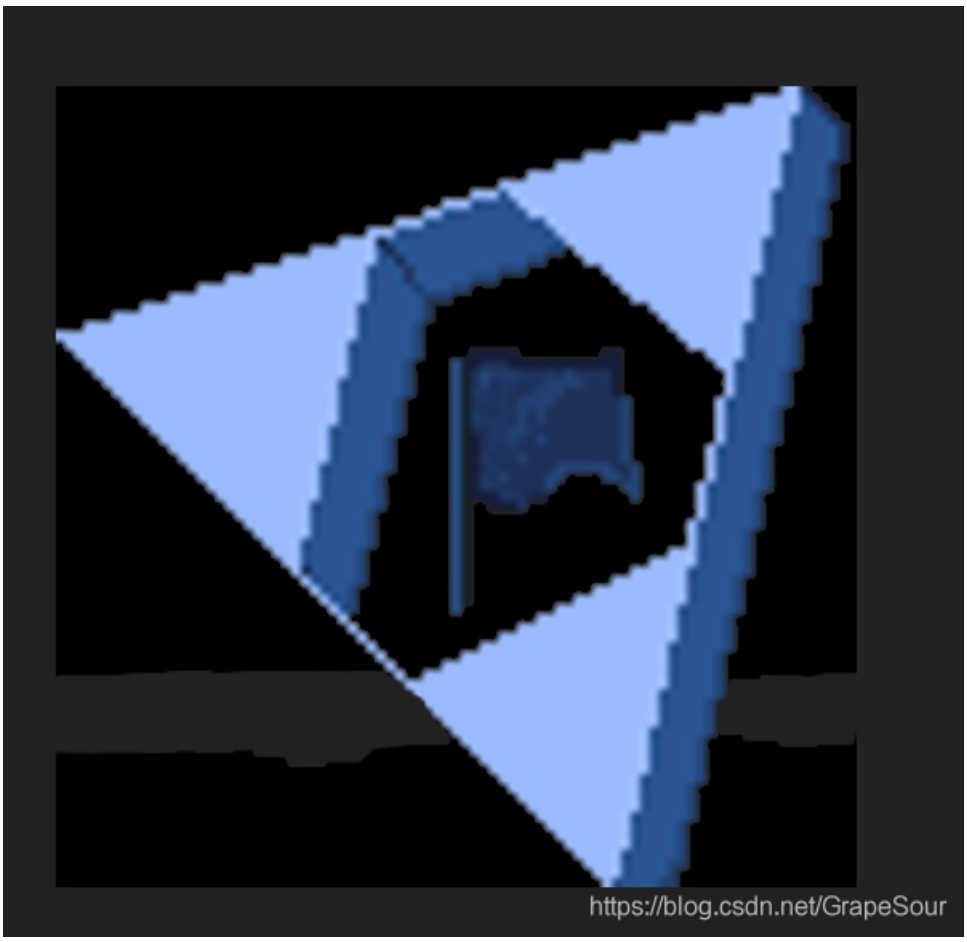
所以flag是
flag{CTF}

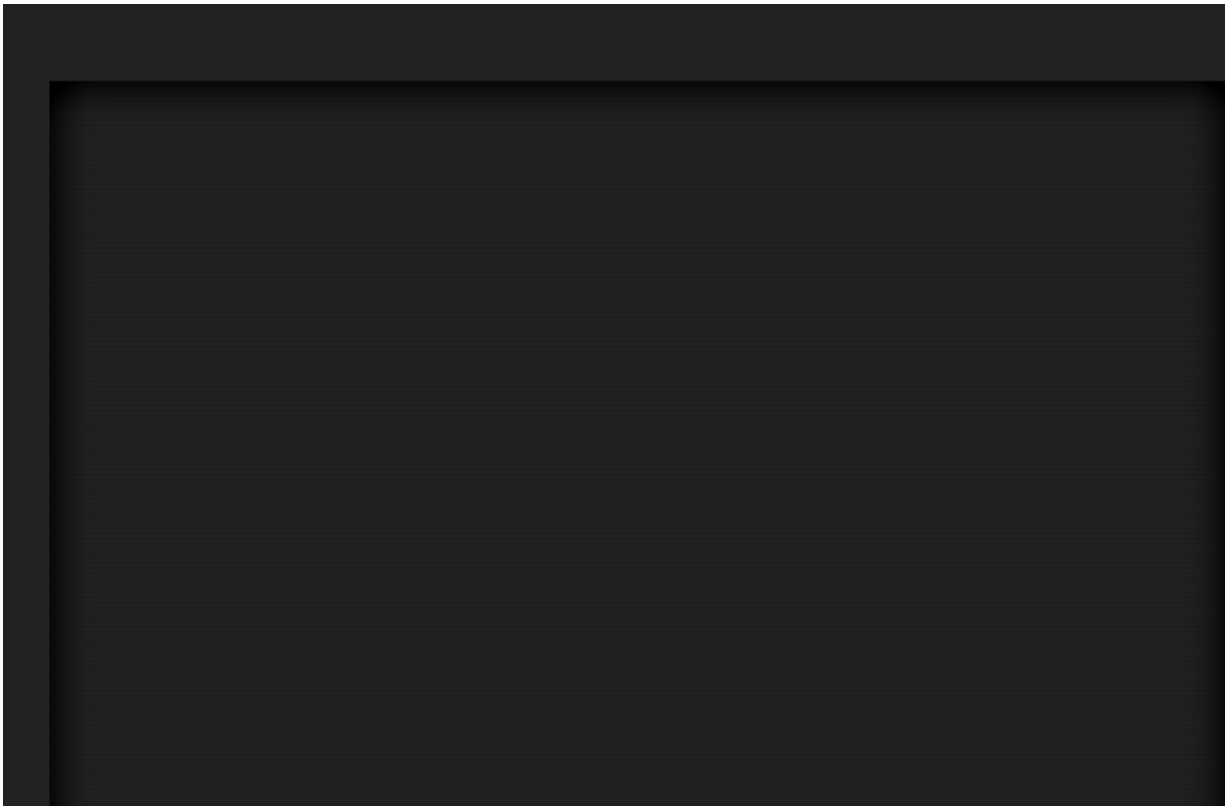
john-in-the-middle

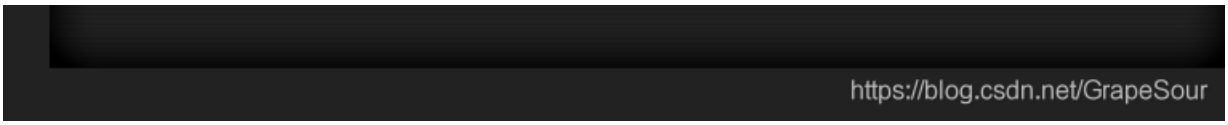
过滤http流，发现一堆图片，导出来

```
GET /js/countdown.js HTTP/1.1
GET /js/jquery.js HTTP/1.1
GET /js/bootstrap.min.js HTTP/1.1
GET /images/logo.png HTTP/1.1
GET /images/sponsor/reply_cv.png HTTP/1.1
GET /images/sponsor/cini.png HTTP/1.1
GET /images/texture.png HTTP/1.1
GET /images/font_c3.png HTTP/1.1
```

```
GET /images/scanlines.png HTTP/1.1
GET /fonts/glyphicons-halflings-regular.woff HTTP
GET /fonts/TopazPlus.woff HTTP/1.1
GET /tunes/between2.mod HTTP/1.1
```

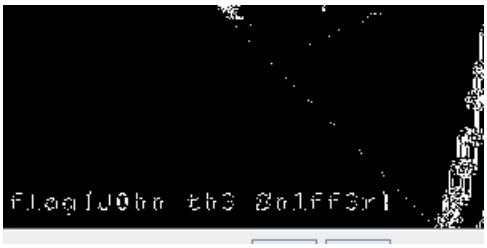




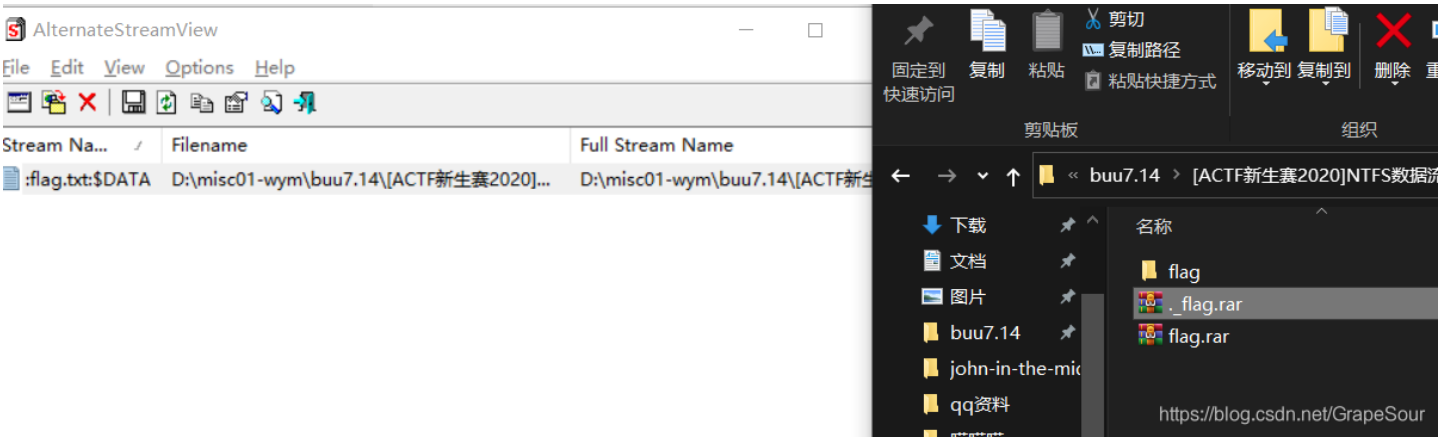


发现两张奇怪的图片
用stegsolve打开

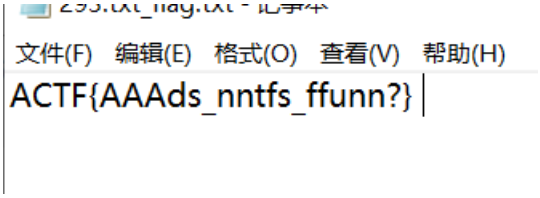
发现奇怪的线条
看logo.png 发现了flag



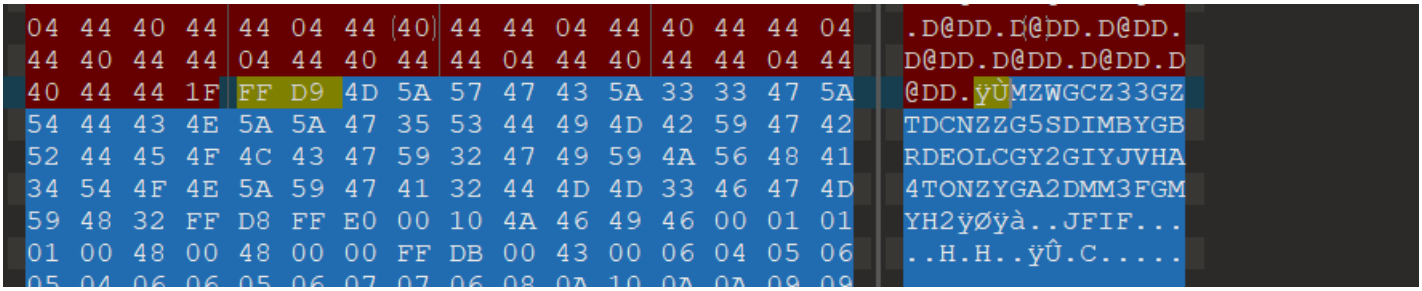
[ACTF新生赛2020]NTFS数据流



解压，用工具，得到



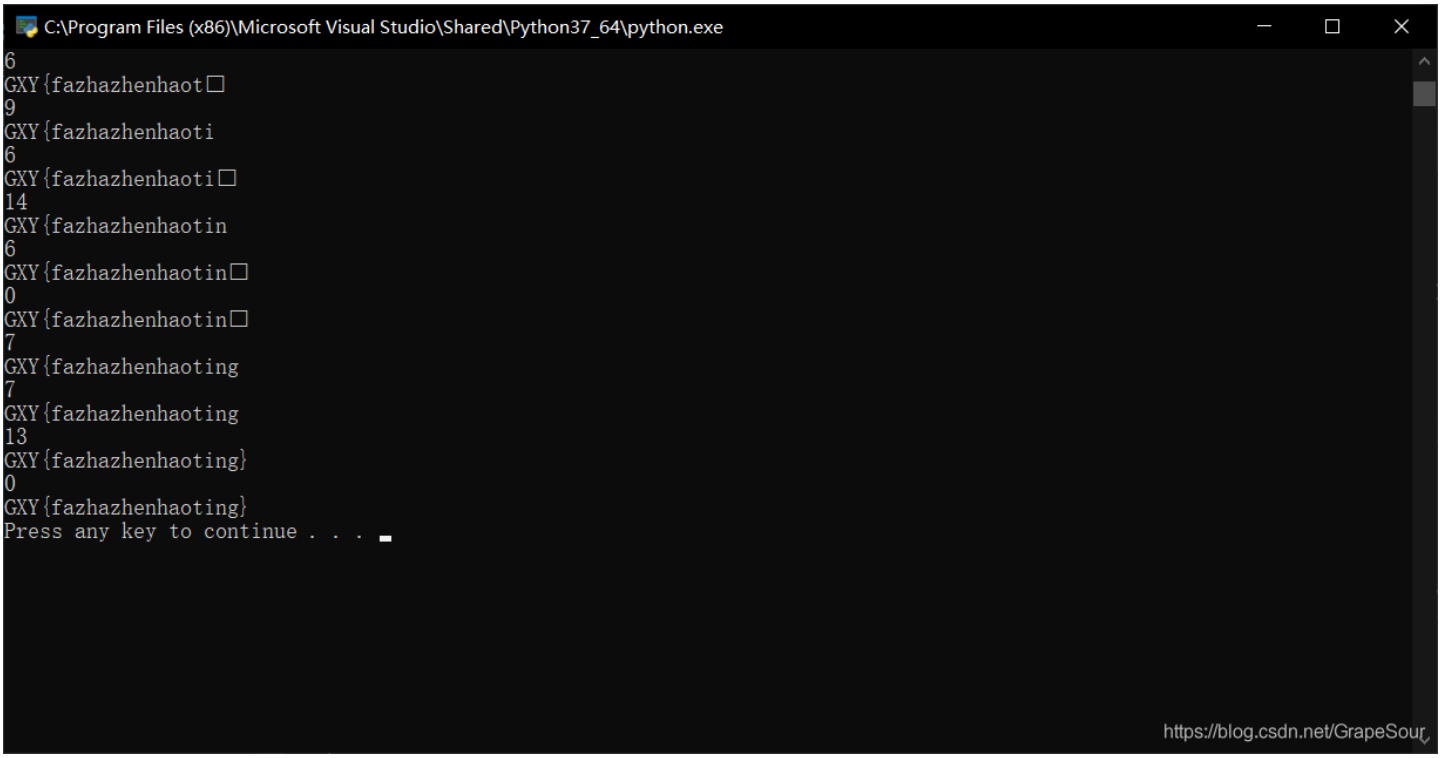
我吃三明治



在两张图片拼接处，发现base32的加密，解密得到flag

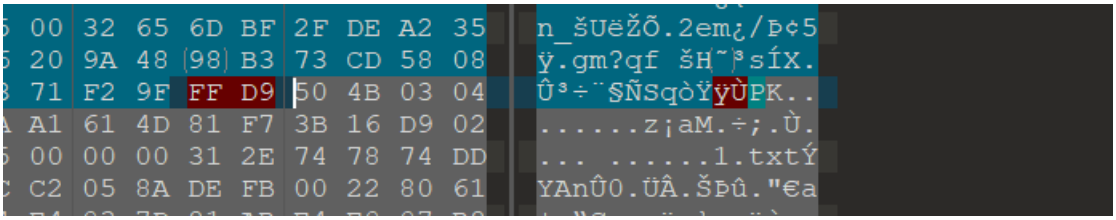
[GXYCTF2019]SXMgdGhpcyBiYXNlPw==

猜测base64隐写

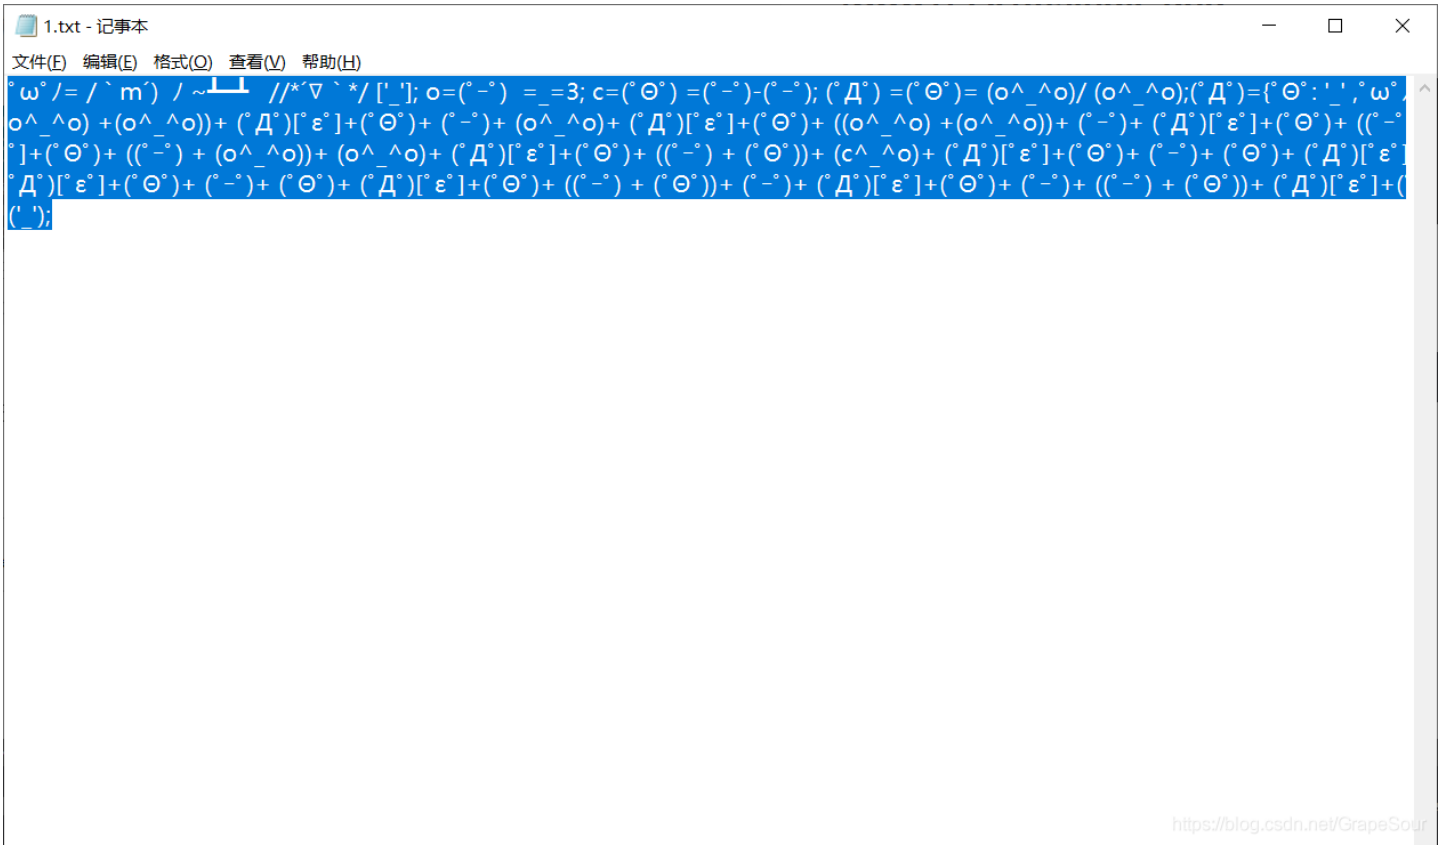


跑解密脚本得到flag

[SUCTF2018]single dog



发现压缩包



http://www.atoolbox.net/Tool.php?Id=703

aaencode编码
