题目描述

My nephew is a fussy eater and is only willing to eat chocolate oreo. Any other flavour and he throws a tantrum.

题目考点

解题思路

```
1 My nephew is a fussy eater and is only willing to eat chocolate oreo. Any other flavour and he throws a tantrum.
```

The site displays the above message when visited. I reloaded the page and captured the request using Burp Suite and found this.

□

I noticed that there is a cookie called flavour which seems to have a Base64 encoded value `c3RyYXdiZXJyeQ==`. Using an online base64 decoder like [this](#), I got the decoded value as Strawberry.

The site says that the nephew only likes chocolate therefore I had an intuition to set the flavour cookie to base64 equivalent of "chocolate". Using the same base64 decoding site, we get `Y2hvY29sYXRl` as base64 encoded text of "chocolate". Now setting the flavour cookie to `Y2hvY29sYXRl` and sending the request, we get the flag.

You don't need to have burpsuite to solve this challenge, although it might be useful in solving higher difficulty problems. A normal browser extension cookie editor will do the job for this challenge.
