这个分区包含ON/OFF开关形式的系统设置。这些设置可包括CID（Carrier or Region ID），USB配置和某些硬件的设置等。这是一个重要的分区，如果损坏或丢失，一些设备的功能将不能正常工作。

```
How to add a partition for customer use
If customer want to create a new partition for their own use, here are some steps can be followed.
1. add a new line in partition.xml, you can following the above item of partition.
2. replace the GUID for your partition, you can generate a unique GUID from www.guidgen.com
website.
3. set the correct partition size and name.
4. set the correct property of this partition for "bootable" and "readonly" items.
Here is an example of oem partition:
<partition label="oem" size_in_kb="4096" type="A695B44A-F1D3-4558-8D37-65CFC0596ABD"
bootable="false" readonly="true" filename=""/>
5. run the python script to generate the GPT header file and rawprogram*.xml for download.
# python ../common/build/build.py
```

contents.xml

```
<tool>
  <name>pil-splitter.py</name>
  <build>common</build>
  <path>./common/config/misc/</path>
</tool> https://blog.csdn.net/weixin\_38148680
```
