ribbon巨坑报错：

我在使用springcloud alibaba的nacos作为配置中心的时候，报错，死活获取不到nacos上的配置信息。一直报

错**sun.misc.Unsafe.park(Native Method)**

完整错误信息如下====》

```

Description:

Parameter 0 of method ribbonServerList in com.alibaba.cloud.nacos.ribbon.NacosRibbonClientConfiguration required
 a bean of type 'com.netflix.client.config.IClientConfig' that could not be found.

Action:

Consider defining a bean of type 'com.netflix.client.config.IClientConfig' in your configuration.

Process finished with exit code 0
.
```
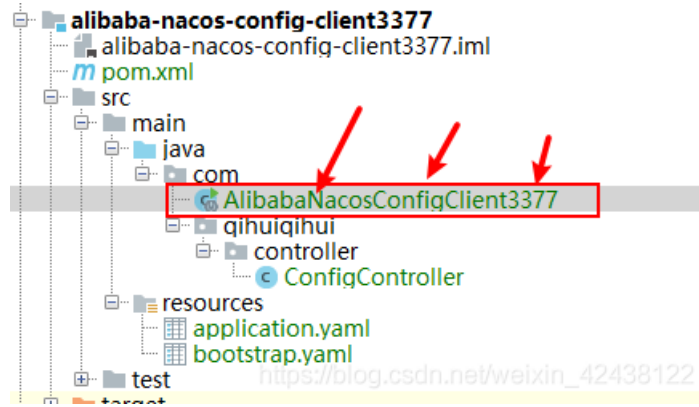

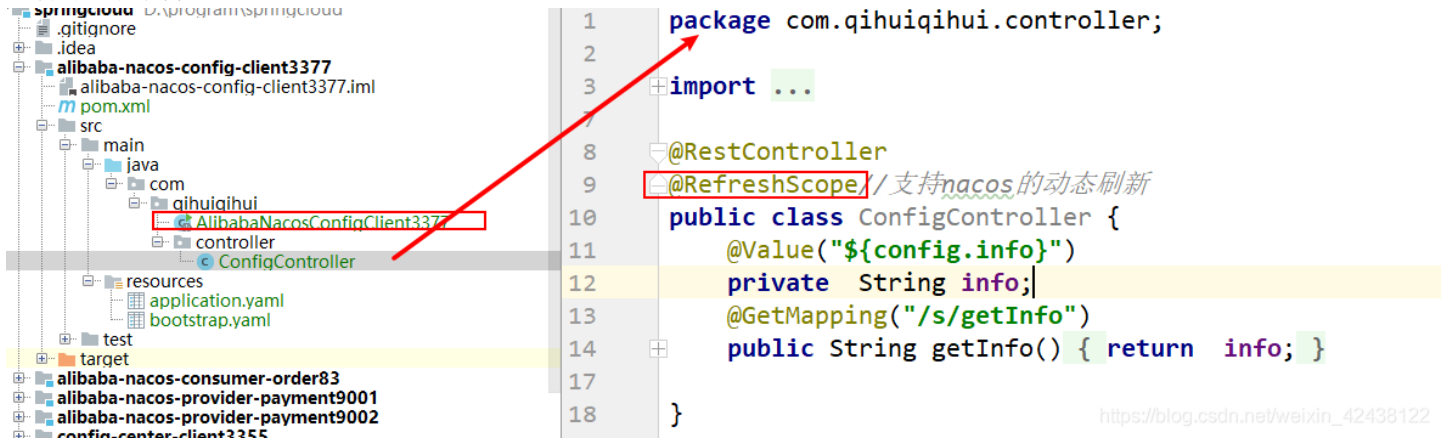

解决办法：

springboot启动类放错位置了，应该放在 @RefreshScope注解上级包下，

正确的目录结构：

```java
package com.qihuiqihui.controller;

import ...

@RestController
@RefreshScope//支持nacos的动态刷新
public class ConfigController {
    @Value("${config.info}")
    private  String info;
    @GetMapping("/s/getInfo")
    public String getInfo() { return  info; }

}
```

就可以解决问题，原因不详，求大佬指点。
