## 关闭tomcat时或者重启tomcat时 log4j2 报错: sun.misc.Unsafe.park(Native Method)

异常信息:

```
30-Aug-2018 15:59:34.900 SEVERE [localhost-startStop-2]
org.apache.catalina.loader.WebappClassLoader.clearReferencesThreads The web application [] appears to have
started a thread named [Thread-14] but has failed to stop it. This is very likely to create a memory leak.

新项目使用log4j2+springmvc的方式,但是报这个错,查了很多资料,原因是log4j2-2.6开始引入shutdown(),在2.6中,如果web app卸载时没有进行shutdown(),tomcat会发布内存泄漏风险的告警。

在web.xml里加入下边代码块,要放在spring相关配置前边

```
<listener>
  <listener-class>org.apache.logging.log4j.web.Log4jServletContextListener</listener-class> </list
```
