Cephalopod

一个流量包, 追踪TCP流发现flag.png字样, 想办法提取出来

```
.....................................d..
.....................flag.png............
.....................................
```

到kali下,binwalk和foremost打一套
发现提取不了flag.png文件

尝试xtract提取
安装

```
sudo apt-get install tcpxtract
```

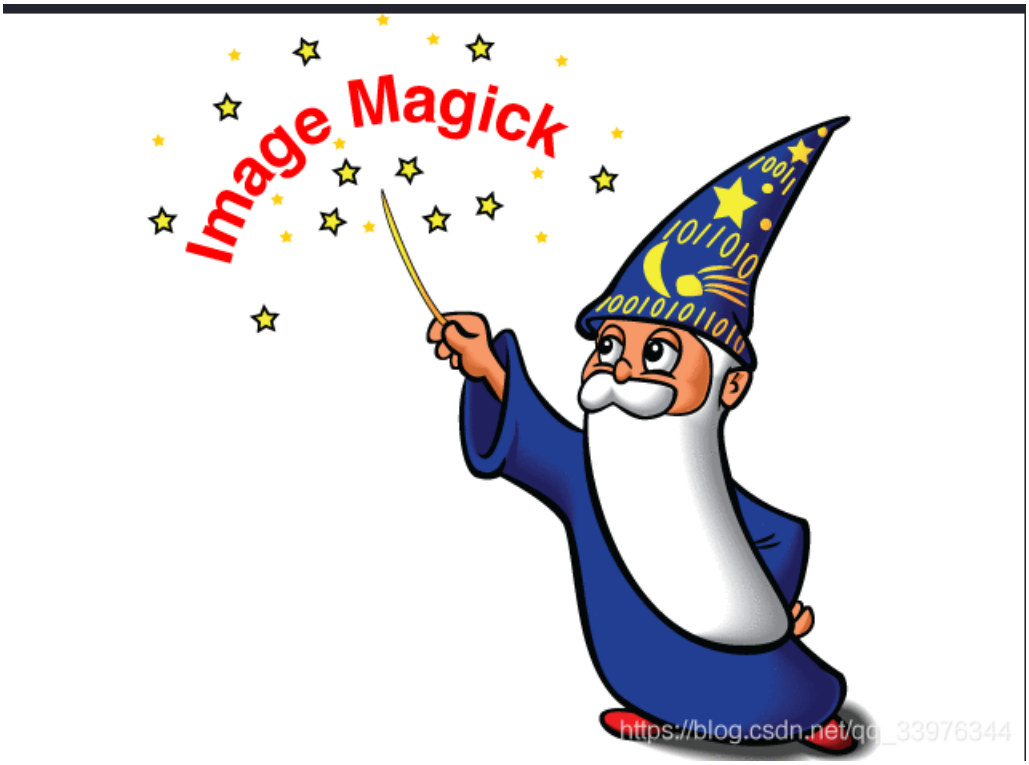
提取

```
tcpxtract -f cepha.pcap
```

结果

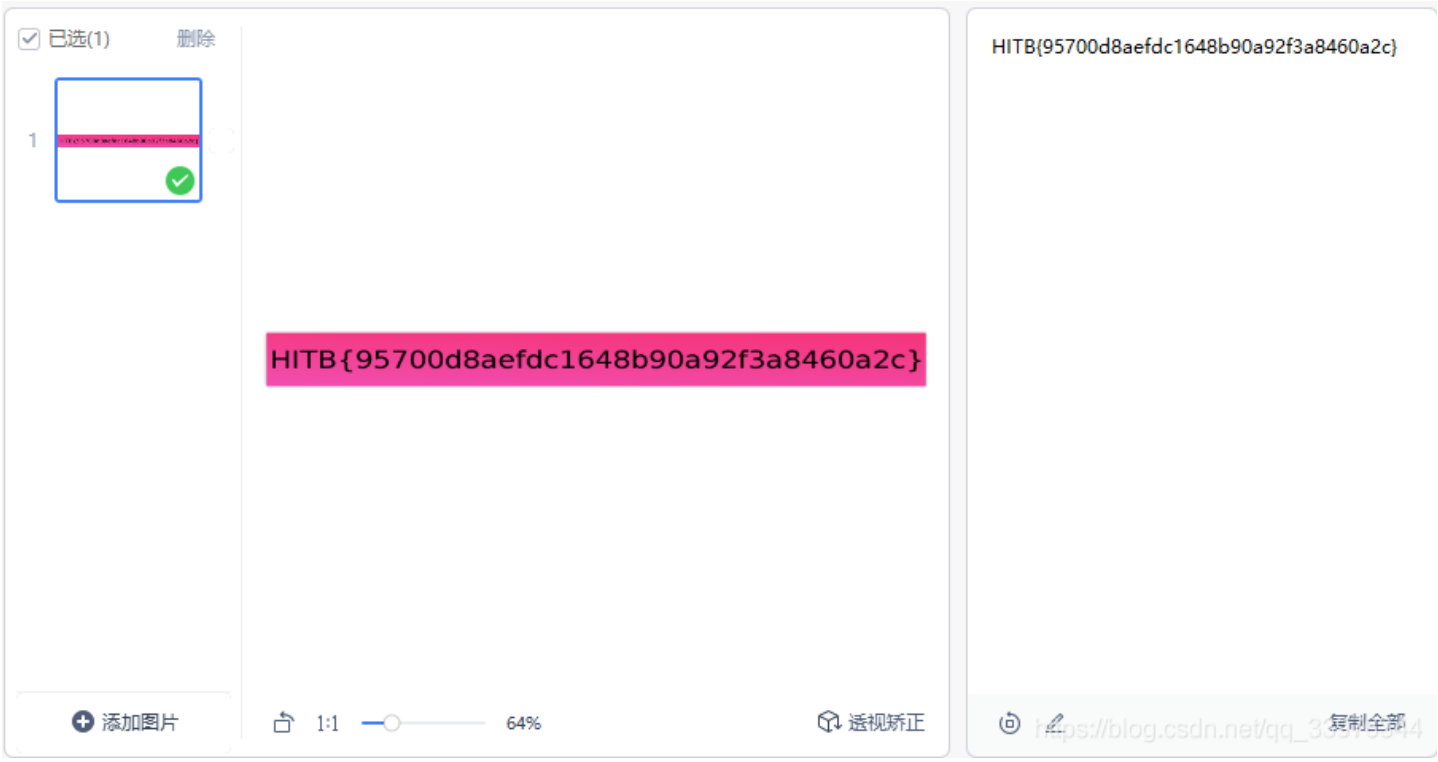
```
falca@kali-297:~/Desktop$ tcpxtract -f cepha.pcap
Found file of type "png" in session [10.0.2.7:49818 → 10.0.2.10:36890], ex
porting to 00000000.png
Found file of type "png" in session [10.0.2.7:49818 → 10.0.2.10:36890], ex
porting to 00000001.png
```

发现在linux下打开有问题, 换到win下打开



HITB{95700d8aefdc1648b90a92f3a8460a2c}

最后提取图中文字得到flag



> HITB{95700d8aefdc1648b90a92f3a8460a2c}
